

CSEN 161 Project Proposal

- **Site title:** Media Stars
- **Team:** Divya Bengali, Iker Mendiburu, Angela Zhou
- **Description of what the web site/app will do:**
 - Users have 3 categories (movies, TV shows, and books) and they can browse through those categories and leave their own ratings
 - The website will show the average rating of the book / show / movie
 - Navigation bar for the categories
- **Details of all technologies to be utilized:**
 - No frameworks are permitted, the backed scripting will have to be in PHP, may use either a database or the file system or both for storing data
 - HTML, CSS, php
 - A dataset of all the user's inputted movie/tv/book that will be stored in a JSON file
 - Animation that allows the user to use a bar to give the rating
- **Any supporting material or sketches that help explain anything needed:**
 - Using Flexbox, left side is the movie and averages, right side are the individual reviews / ratings
